BEAVER PLASTICS

propagation trays with results

Hortiblock 162/28

From container to container transplanting or field transplanting, the reusable Hortiblock 162/28 with solid media is a top performer. Growers will appreciate the well-balanced and well-rooted plugs. Beaver Plastics uses sealed surface technology to manufacture the tray with ribbed cavities and a large drain hole. The rigid Hortiblock tray is easy to handle and works with all conventional production systems.
