

QPlugs®

STABILIZED ROOTING MEDIA

Q Plug is the key to maintaining a clean growing environment

It is specifically designed to germinate seedlings or root cuttings in a closely populated tray system. Q Plug provides more air porosity for better roots and provide more water control than anything else on the market. Better roots equal better, healthier plants.

Q Plug has been engineered to help your plants root faster and because of our proprietary bonded soil, you will be able to handle your plants at any age. Comprised of all-natural ingredient inputs, Q Plug has environmental sustainability in mind.

Available in 3", 4" and multiple 6" configurations!
